BUILD

Service 03 of 03

Foundation Build

You know what you need. We deploy the Visgo Framework — an agentic foundation tailored to your business. Your team operates it, extends it, and owns it. No ongoing license, no dependency on us.

ALIGN

Scope and design

Focused alignment to confirm scope and approach. If you've completed Assess or Plan, this moves faster.

BUILD

Implement and validate

The team deploys the Visgo Framework around your workflows, data, and team. Built and validated alongside you.

HANDOFF

Train and transfer

Documentation, training, and complete handoff. You own framework, code, and knowledge.

WHAT YOU RECEIVE — EVERY BUILD ENGAGEMENT

- ✓ **Knowledgeable AI Agent** — interfaces with your products & services
- ✓ **Command-line interface (CLI)** — direct system access
- ✓ **Source control integration** — trained on your code history
- ✓ **Full internal API documentation** — end-to-end
- ✓ **Agentic framework** — your team uses it going forward
- ✓ **Kanban product/task management** — PM front-end

Single Product or System

Typical timeline: 30 days

as low as

$25K CAD

Comprehensive: Multiple Systems

Typical timeline: 30–60 days

as low as

$35K CAD

BUILT FOR

Teams ready to ship and own the foundation. No lock-in.

You know what AI capability you need. You don't want a vendor relationship that grows over time — you want a foundation your team controls. Build delivers a deployed, documented, validated agentic system you fully own. Add-on capacity available (sitting-fee model) if you need feature acceleration after handoff.
